Forecast for Thursday 18 May 2023

Weather: Mostly cloudy with patchy light rain and drizzle, mostly affecting hills near to West Coast during the morning, extending eastwards across many ranges during the afternoon. Dry, brighter weather will follow from the west in the evening.

Chance of cloud-free hill tops above 800m: 30% in west of area, 70% in east.

Low cloud and visibility: Generally good visibility in east of area and occasional cloud cover about 700 to 800m with the main cloud canopy above the summits. Clouds more extensive in the west of area, bases lower down the hills with misty conditions and poor visibility in rain and drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Feeling unseasonably cold at higher elevations due to combination of fresh winds and single figure temperatures.

Forecast for Friday 19 May 2023
Weather: A dry and brighter day across the Northwest Highlands with sunny spells. It will become cloudy later in afternoon and evening.

Maximum wind: Southwest winds with average speeds of 15 to 20mph and gusts 30mph on the tops.

Chance of cloud-free hill tops above 800m: 80% reducing 40% during evening.

Low cloud and visibility: Very good visibility with patches of cloud about 700 to 800m. Clouds will become more extensive later in the day.

Temperature: **Glens:** Plus 8 Celsius at dawn rising to 15 Celsius.
At 800m: Plus 5 Celsius
Freezing level: 1400m
